# **A New Approach to Established Assets** with a Rapid Path to Production

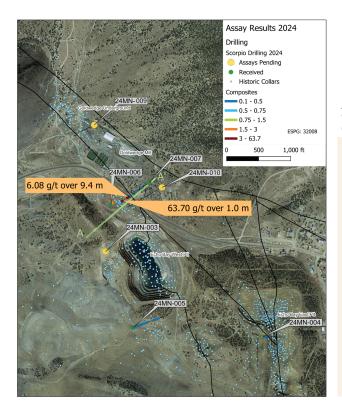

### MANHATTAN **Maiden Resource Imminent**

#### **Project Highlights:**

- High-grade open-pit gold zone
- · Previous drilling indicated a significant resource is imminent
- Potential for a re-rate of the company with blue-sky exploration and expansion possibilities
- Significant exploration to expand open-pit intercepts
- Over 100,000 meters of drilling historically across 1,100 drill holes by Echo Bay Mines and Kinross
- · Scorpio Gold endeavours to connect the Goldwedge Mine, Echo Bay West Pit, Echo Bay East Pit and the Caldera Splay zone

#### Near-term catalyst:

Potential to define a large open-pit resource on the consolidated Manhattan district with the goal of becoming a greater than 2M ounce gold deposit.

Composite assay grades presented are defined as mineralized intervals using an Au grade minimum average of 0.10 g/t with no break in mineralization greater than 3.00 m. Higher grade composite sections may include intervals using a 1.00 g/t Au cut-off. "Interval" is drilled interva

MINERAL RIDGE **Discovery Potential** 

#### **Project Highlights:**

- · Produced over 1M ounces of gold
- Fully permitted and licensed mine with considerable infrastructure - ready to re-start!

#### North Star Target:

- Has potential to be the host feeder system that fed gold into Mineral Ridae
- · Potential for high-grade and better metallurgy
- · Potential for discovery can leverage established mine and permitting

#### **Overall Upside:**

- · Scorpio Gold holds valuable water rights in the region one out of two holders of water rights
- High-grade mineralization on surface, channel and grab samples (greater than 30-32 g/t gold)
- Exploration potential along 17 km mineralized strike length on the consolidated ridge

#### Near-term catalyst:

• Update the 2018, feasibility study with current gold price. The feasibility study shows a 106% increase in NPV with a 20% increase in metal price to \$1500/oz gold.

# Milestones & Near-Term Catalysts

### Feb 2024

Manhattan: Scorpio Closes \$6M Private Placement and amalgamation with Altus Gold, consolidating Mineral Ridge district

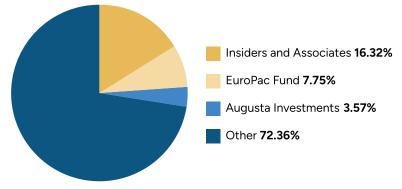

### Q2 2024

Drill/Exploration Program: Begin exploration program at Manhattan.

Beginning preliminary work towards getting internal Manhattan Resource estimate compliant.

Update 2018 Mineral Ridge Feasibility Study from \$1,200 gold prices to current Gold Price.

## Q3 + Q4 2024

Receive exploration program results.

Explore production scenarios at Manhattan + Mineral Ridge.

Planning Exploration program at North Star Target on Mineral Ridge.

3

4

### Q12025

Announce Maiden Resource at Manhattan.

**Begin Metallurgical** Study on Manhattan.

# **Investment Upside**

A new resource estimate at the Manhattan property

- New Approach and Management: Fresh capital, 1 new investors, and management with strong technical team and capital markets access, clear plan to create new value quickly.
  - Notable Resource Forthcoming: Manhattan project - past drilling defined open-pit zone of scale and grade. Minimal investment away from a resource that has potential to re-rate the company.
  - Beyond the Resource: District scale opportunity suggests good mineralization potential to expand resource along strike significantly.

Mineral Ridge and North Star: Permitted mine with significant infrastructure, modest resource, and undrilled exploration potential to define bigger system (higher grades, better metallurgy).
